8:00 – 4:00 p.m.

Mabel Fire Hall
109 North Elm Street
Mabel, MN 55954

Description

Your service, the patients you transport, and the general public rely on your ability to remain calm and focused while maneuvering safely through traffic. Without this ability, your crew would be unable to complete their duties, your patients would not receive the care they need, and public safety would be in jeopardy.

As a medical professional, your skills must be kept up to date. *Coaching the Emergency Vehicle Operator* has been designed specifically to help you refresh and improve your driving skills in both emergency and non-emergency situations.

Intended Participants

This class is intended for persons who may be responsible for driving an ambulance. This includes ambulance crew, first responders and members of community who have been recruited as “drivers”. Persons must be affiliated with a recognized ambulance service.

Objectives

- To evaluate the need for an emergency vehicle operators course by using needs analysis.
- To identify problems facing emergency vehicle operators.
- To motivate emergency vehicle operators to recognize the importance of emergency vehicle operator training.
- To define the personal qualities and attributes which are necessary for operating an emergency vehicle.
- To review the legal responsibilities of the emergency vehicle operator.
- To discuss the physical forces which impact upon the operation of an emergency vehicle.
- To explain the importance of a preventive vehicle maintenance and maintenance record program.
- To review the need for standard operating procedures.
- To examine the state and local laws dealing with the operation of an emergency vehicle.
- To provide the student with an opportunity to perform "hands-on" operation through a designated driving course.

Format

This is a “hands-on” class and your participation is vital to your learning experience. By watching the video presentation, completing exercises in the Response book, participating in behind the wheel exercises, and incorporating the learned skills into your daily driving, you will reduce your chances of becoming involved in a motor vehicle collision.

Note to Participants

Participants are encouraged to bring their own emergency vehicle; however, a vehicle will be available on site for those who are unable to do so.

Cost

Regional dollars provided by SE Minnesota EMS has made it possible to offer this program at the reduced fee of \$50.00 per student.

Business checks can be made payable to SE MN EMS and mailed with registration form to:
(Sorry, we do not accept personal checks)

SE Minnesota EMS
1130½ 7th St NW, Ste 201
Rochester, MN 55901

A confirmation letter will be sent to registrants along with training site information!

Accreditation

This program has been designed to meet the continuing education requirements for seven contact hours for EMTs.
